FINAL_CY2016_TRW_Asbestos_Committee_Annual_Report_11'02'2016.docx

Ernie and Fran,

There is a technical review workgroup on asbestos (TRW). There is an Excel spreadsheet in the second attachment that compares risk of certain exposure scenarios with various contributions from Libby amphibole fibers and chrysotile. I just gave them a quick perusal. Ernie if you can look at this and see how or if we can use this, we can discuss it later. I foresee us having separate meetings with ORD in the future to discuss these issues after we get the initial contract issues under control. Thanks.

Andrea

Andrea and Brian

I wanted you to see what the Agency Asbestos Technical Review Workgroup is doing so you can decide whether there is something of use to you. I think Tom Simons is a member on this group so maybe you have it already.

Also, Emma will participate in your group from NCEA and I will have Walter Cybulski from OSP sit on the group as well. So, if you can add him to the list of members, that would be great. Thanks.

Jackie
